Greening to meet the railway she runs?

by THE FACT COMPILER • FEB. 1, 2012

Eye's man with the soothing bedside manner has been in contact.

Apparently Cruella will be spending more time than expected under doctor's orders, following her recent bicycle contretemps.

Eye of course joins the rest of the railway in wishing Theresa a speedy recovery.

However, every cloud and all that.

With the department one minister down it will fall to the Captain of Netball to sell the government's exciting new franchising policy to a frankly sceptical industry.

No doubt there is growing panic in Marsham Street that Ms Greening might actually start meeting people who run real trains?
