## 1. Purpose of paper

- 1.1 To provide an overview of the draft National Policing Plan targets and the main business done at the second meeting of the Authority's Policing Plan Working Group (PPWG).
- 1.2 To invite Members to review, discuss and approve the draft BTP National Policing Plan targets for external consultation, to begin week commencing 17<sup>th</sup> December.

## 2. Background

- 2.1 As set out in section 52 of the Railways and Transport Safety Act 2003, at the start of each financial year the Authority is required to issue a plan setting out the arrangements for the policing of the railways during that year. As in previous years the detailed work on the development of the draft National and Local Plans for 2013/14 is being carried out by the Authority's PPWG.
- 2.2 Throughout this year's process the Force and Authority have worked closely together on coordinating engagement activities and refining iterations of the narrative and detailed targets within the draft Plans. The Group has met formally twice this year in the preparation of the draft Plans.
  - 27<sup>th</sup> September - 'stakeholder workshop' supported by all Working Group members
  - 4<sup>th</sup> October - Meeting 1, headline themes and first principles agreed
  - 30<sup>th</sup> November - Meeting 2, first review of the National Plan
  - 21<sup>st</sup> February - Meeting 3, final meeting of the Group will take place, review of Common and Local Plans

- 2.3 Following the initial discussions at our stakeholder workshop, feedback from stakeholders was discussed at the first meeting of the PPWG and used to frame the proposed National Policing Plan targets.
- 2.4 Both the Force and the Authority remain aware of the need to manage the overall number of targets for 2013/14 in order to ensure that resources are properly focused on the key priorities of our stakeholders. This approach both resonates with the steer given by our stakeholders and the direction taken by the Home Office to move away from a multiplicity of top-down targets to a single national target to reduce crime.
- 2.5 In terms of the shape of the Plan, the existing two tier approach has again been supported by our stakeholders but with a greater shift in focus from national to local priorities. As such a National Plan is proposed again for 2013/14 which will be supported by Local Plans on each of BTP's seven Areas. The existing strategic themes were used to frame the draft National targets. These themes are:
- Keeping the railway running;
  - Making the railway safer and more secure;
  - Delivering value for money through continuous improvement;
  - Promoting confidence in the use of the railway.

### **3. On-train disruption – Overview of the London South pilot**

- 3.1 The Group was informed that this project was not completed as expected. This was because the main people responsible for driving this project, both at BTP and Network Rail, left the respective organisations. The project had looked at Problem Solving Plans (PSPs) regarding disruption; however these were not specific to on-train disruption.
- 3.2 BTP has, following an action from the previous PPWG meeting, received data showing the extent of on-train disruption on East Coast. This had been informative in terms of its extent and impact. The Force is making progress in reducing disruption due to cable theft and fatality management, and on suicide and mental health issues; the next area to look at will be disruption caused by minor on-train disorder. The Group was informed that this type of disruption would be picked up by the proposed target to reduce overall disruption minutes.

## 4. Draft National Policing Plan

4.1 The Group received BTP's draft National Policing Plan targets (attached to this report at Appendix A) and noted that there was extensive internal consultation within BTP on how the targets should look. The plan will have fewer national targets, which will be reflected more clearly in the Local Policing Plan targets.

4.2 Discussions were focussed around the following headline issues:

- Target 1: Reduce police-related disruption minutes from the 2012/13 figure - This target will be disaggregated to the Force areas. The aim will be for the areas to liaise with stakeholders to agree locations, crime types, etc. The Force, at a national level, will look at each area and expect them to reduce delay by whatever quantum is agreed.

The impact of the £5 million funding for the National Metal Theft Taskforce coming to an end and the forthcoming scrap metal dealers legislation were discussed. There was concern by the Force that, although still a focus for BTP, other forces had moved their focus elsewhere. There was discussion about whether there could be a specific reduction outcome target if the industry were to sign-up in partnership with BTP. It was highlighted that the £5 million funding has had a £100 million impact. Members stated that it was rare to have an impact as demonstrable as this.

There was discussion about whether to include a metric for the disruption target. The Group was informed that BTP was not ready to do this until there was a better understanding of the data. This year has seen some very good reductions for cable theft and fatalities, and although it may be possible to achieve slightly further reductions, it will be a challenge to maintain this level.

It was proposed that a metric be left out at this stage with a view to waiting until January or February, by which date the Force will have a better picture, to introduce a metric. There was a concern that this would result in this not being a SMART target. Members stated that BTP had bought itself an enormous amount credit and a lot of goodwill from the industry because of its efforts to reduce disruption in the current year.

- Target 2: Non-suspicious and unexplained fatalities to be cleared within an average of 90 minutes - The only category not to be included within this target would be suspicious fatalities; however the Force will monitor these. BTP has, so far this year, achieved an average clearance time of 84 minutes for suspicious and unexplained fatalities.

Members questioned whether the clearance time could be reduced to 85 minutes. It was felt that the current 90 minutes time was well understood both internally and nationally. It was agreed that if the unexplained fatalities could be brought within this target that would be a good achievement.

- Target 3: Reduce overall crime (excluding police generated) from the 2012/13 figure - The Group noted the good crime reductions which had already been achieved and that this is core business for the Force.

This will be a straight reduction target. The Group was informed that if a metric is set this could drive a focus on volume crime.

- Target 4: Maintain the notifiable crime detection rate - It was agreed that, for the purpose of presenting this to stakeholders, the wording of the target is changed to “at least maintain”.
- Target 5: Increase the percentage of budget spent on frontline resources - The Group was informed that this target was about having a sustained review of back-office functions and altering the balance to frontline resources.

The Members discussed the HMIC definitions of front, middle and back office roles. It was suggested that the BTP categories be aligned to the CIPFA categories and that once agreed these would be fixed. The Force agreed to look at a potential value to be used as a metric for this target.

- Target 6: Increase the availability of staff - The aim for this target is to improve on the current sickness target by also including other measures. There was discussion about temporary duty restrictions (TDRs) and sickness. Force areas may say that TDRs can be a good thing if someone is not fit so it is necessary to strike a balance. It was suggested that the figure for all those on TDR is

included when reporting on performance even if they are not included within the target. It would be useful to have visibility of these people to further understand the figures. The Force remained open to other measures being included and will continue to develop this target.

- Target 7: Increase/maintain late night visibility from the 2012/13 figure - The Group was informed that people within the Force are not particularly satisfied with the current visibility target. The Force areas, over previous years, have picked up slightly different ways of informing the centre which officers to count when calculating officers on duty. The target has been extended to 3am due to the timing of shifts and some inconsistencies in the way that hours are currently counted. The Force is developing a tighter definition and improving its monitoring of this.
- Target 8: Increase the number of detections for public order offences from the 2012/13 figures - the Group noted that this target will focus on the mid-level disorderly behaviour that can be caused by people who are drunk, late at night, and who may be assaulting staff and acting in a nasty manner. It does not aim to unnecessarily criminalise those who have committed minor offences.

## **5. Recommendations**

- 5.1 Members are asked to review the proposals outlined in Appendix A and approve the draft national policing plan for consultation.

**Date:** 30 November 2012  
**Subject:** 2013-14 Policing Plan – National targets  
**Sponsor:** Deputy Chief Constable  
**For:** Discussion / Decision

---

**1. PURPOSE OF PAPER**

1.1. This paper details BTP's proposed 2013-14 National Policing Plan targets for review and discussion by the BTPA Policing Plan Working Group, with an overview of the rationale for the targets proposed.

**2. BACKGROUND**

2.1 At the first Policing Plan Working Group meeting (4 October 2012) members agreed a direction of travel and discussed a range of possible National targets. The targets proposed in this paper reflect internal development work and consultation (including discussion at Service Excellence Board on 22 November 2012).

**3. PLANNING CONTEXT**

3.1 The context for the 2013-14 Policing Plan will be extremely challenging, both operationally and organisationally. The economic, political and economic environment will be complex and evolving. In particular, the policing and rail transport sectors are undergoing unprecedented transformation. The introduction of Police and Crime Commissioners and the implementation of the single Scottish Police Service will change the nature of UK policing and further the localism agenda which is prominent within current political thinking. Within the policing arena the police service's monopoly over the provision of security services is eroding and there are severe economic pressures being exerted by the Comprehensive Spending Review.

NOT PROTECTIVELY MARKED

- 3.2 The railway industry is undergoing significant, long lasting, change with much longer-term franchises and fewer, more powerful, operators likely to emerge with combined responsibility for train and track operation. Demand for BTP's services during this Policing Plan year and for at least the duration of the next Strategic Plan will increase as the economic imperative to keep the railway free from disruption becomes even more compelling due to the future growth of the network.
- 3.3 The increased demand for BTP's services will be compounded by the increasing use of social media in the criminal justice arena. There has been an exponential use of sites such as Facebook, Youtube and Twitter to report and expose criminal and antisocial behaviour by the public. BTP are implementing a system whereby members of the public are able to upload photographs and videos to the 'BTP Cloud' anonymously or by providing contact details with only the location of the photo or video being mandatory. It is expected that this method of contacting and reporting to the police will continue to grow in the future, further stretching resources.
- 3.4 Faced with this future, it is likely that a tipping point will soon be reached within where levels of crime and demand reach such a level that, in order to continue to provide an effective policing service to the railway, RPI-related budget settlements alone will not be enough. Therefore, throughout the period of this Plan, BTP will examine other ways of increasing the frontline resource within the current budget constraints through initiatives such as Operation Enterprise, the Corporate Resources Transformation Programme.
- 3.5 This Plan will also be the delivery plan for the first year of the new Strategic Plan. Although the detail of the new Strategic Plan is being finalised, at the BTPA Stakeholder event in September attendees endorsed the current Strategic Objectives as still relevant. Discussion around the new strategy has identified the need for BTP to continue to offer operational excellence and financial transparency, with the goal of becoming the automatic choice of police service provider even if there was no statutory requirement for operators to do so. It is in this context that the targets outlined below have been constructed.

NOT PROTECTIVELY MARKED

#### **4. PROPOSED NATIONAL TARGETS**

##### **KEEPING THE RAILWAY RUNNING**

##### **4.1 Reduce police-related disruption minutes from the 2012-13 figure**

Reducing disruption is the number one priority that has been consistently identified by BTP's stakeholders and this will be the third year that it has been a specific Policing Plan target. It is also key to the McNulty agenda of improving the efficiency of the UK rail industry and is one of the key ways BTP can enable the wider industry to meet future challenges. BTP continues to work hard with partners and to allocate a great deal of resources to tackling the causes of disruption and reducing the impact on the industry and passengers.

The 2012-13 Plan contained a target to reduce disruption, in partnership, at key hotspot locations. This has been very successful, with disruption reducing by 42% at these locations. However, though these were to be delivered through problem solving plans, there has been limited engagement from partners at some of these locations. Any commitment to a future reduction is dependent on a joint approach.

Overall disruption has also reduced, by 31%, and reductions have also been recorded in each disruption category associated with police activity. There is a possibility that during 2013-14 a one-off or relatively small number of significant incidents, outside of BTP's control, could undermine the achievement of the whole target.

Much of the reduction in minutes this year has come from the reductions in cable theft and the management of fatalities. Minutes related to cable theft have reduced by 62% (and the related category vandalism and theft by 50%) and fatality-related minutes have reduced by 11%. These are important categories which account for 15% and 33% of all police-related lost minutes respectively. However, the £5m funding for the cable theft task force will come to an end in 2013, which will significantly impact on the ability to suppress crime in this area. It is also unlikely that the significant reductions in fatality-related minutes will be able to be reproduced as the majority of the revised operating

NOT PROTECTIVELY MARKED

procedures will have been embedded throughout this performance year. It will therefore be challenging to maintain the significantly reduced figure achieved this year and it is recommended that a simple reduction target, rather than a percentage reduction target, is set for 2013-14. This would be a national target, but there would be a central requirement for Areas to agree priority locations with stakeholders in their local plans. Each Area would have to achieve the disaggregated target but partners would have local influences on where activity should take place.

It is imperative that, if agreed, this target is tackled in genuine partnership between BTP, Network Rail and train operators in order for it to be properly managed and risks mitigated. At the last Subgroup meeting, Members discussed the requirement for an effective forum for raising concerns if partners did not contribute to this partnership. It was suggested that the National Task Force could be a suitable meeting for issues such as this to be raised. SEB members have requested that a review of the data received from Network Rail is carried out to ensure that minutes lost are properly recorded and that there is a correct allocation of minutes to police-related categories.

#### **4.2 Non suspicious and unexplained fatalities to be cleared within an average of 90 minutes**

BTP's average time for clearing non-suspicious fatalities during this performance year is 76 minutes: the same as last year. BTP has also reduced disruption on the railway by classifying fewer fatalities as unexplained: 20 to date compared to 60 at this time last year. The need for site examination and, if necessary, forensics increases the average clearance time required for unexplained fatalities: it is currently 143 minutes. Reducing the number of fatalities initially classified as unexplained has helped reduce the combined average clearance time from 113 minutes in 2011-12 to 84 minutes in 2012-13.

The driver for these improvements has been the development and implementation of a revised Fatality Guidance Manual. The Manual was produced following a comprehensive review of fatality management procedures; it clarifies roles, responsibilities, procedures and the required liaison with HM Coroners / the Procurator Fiscal, Home Office Pathologists and NWR. It also involves the review of all fatalities with clearance times over 90 minutes, to identify the reasons for the delay and improve best practice.

To ensure the revised procedures are adopted throughout BTP, since the release of the new Manual, Territorial Policing has provided ongoing support for the Areas:

- further Fatality Workshops for Sergeants, Inspectors and Control Room staff;
- changes to new recruit and leadership courses;
- conference calls and Area lead liaison to review incidents and improve best practice;
- Industry engagement to ensure they are aware of the changes;
- supplying Areas with video equipment and body coverings to expedite body removal

This target is therefore proposed to reflect the management of fatalities as a continuing top priority for BTP, focussing on sustaining the current excellent progress in reducing associated disruption. It was noted at SEB that this target will be particularly hard for outer London Areas to achieve and that careful consideration will need to be given as to

**BRITISH

NOT PROTECTIVELY MARKED

**MAKING THE RAILWAY SAFER AND MORE SECURE**

**4.3 Reduce overall notifiable crime (excluding police generated<sup>1</sup>) from the 2012-13 figure**

Reducing crime is at the core of BTP’s purpose and activities, and alongside reducing disruption, it has consistently been identified by stakeholders as a top priority for BTP. Over the eight year period to the end of 2011-12, BTP reduced notifiable offences by 34%, and in doing so, made significant reductions in priority crimes such as robbery (down 76%), violence against the person (down 9%), and notifiable route crime (down 66%). BTP also achieved this target last year, with a reduction to 50,925 offences (from 55,680 offences in 2010-11)

Year to date, crime has reduced by 4%. However, as highlighted in the Strategic Assessment, at some stage there is likely to be a tipping point where increased passenger numbers and railway usage means that further reductions are not possible, so this will be an extremely challenging target. It is proposed that a straight reduction target for next year is agreed. BTP performance in reducing overall notifiable crime over the last eight years is as follows:

<b>Performance Year</b>	<b>Notifiable crime</b>	<b>% reduction</b>	<b>Cumulative % reduction</b>
2003-04	83,296		
2004-05	81,601	-2.0%	-2.0%
2005-06	79,190	-3.0%	-4.9%
2006-07	79,037	-0.2%	-5.1%
2007-08	70,274	-11.1%	-15.6%
2008-09	67,119	-4.5%	-19.4%
2009-10	62,111	-7.5%	-25.4%
2010-11	60,364	-2.8%	-27.5%
2011-12	54,886	-9.1%	-34.1%

<sup>1</sup> All notifiable offences excluding all drugs offences and possession of offensive weapons.

NOT PROTECTIVELY MARKED

Performance in regard to reducing notifiable crime (excluding police generated offences) is as below:

Overall notifiable offences (excluding police generated offences) - OFFENCES		2009-10	2010-11	2011-12	% +/- 2011-12 vs 2009-10	2011-12 (1 Apr - 29 Nov)	2012-13 (1 Apr - 29 Nov)	% +/- YTD
	London North	11,411	11,330	10,878	-5%	7,719	7,532	-2%
London South	13,190	13,182	12,326	-7%	8,600	8,342	-3%	
London Underground	13,158	12,671	11,085	-16%	7,427	8,046	8%	
North Eastern	5,370	5,689	4,946	-8%	3,567	2,931	-18%

<b>BTP</b>	<b>55,595</b>	<b>55,591</b>	<b>50,850</b>	<b>-9%</b>	<b>35,654</b>	<b>34,328</b>	<b>-4%</b>	

**4.4 Increase or maintain the notifiable crime detection rate**

The notifiable detection rate for BTP has remained at 32% for the last two years (after falling from the highest ever of 35%) and currently remains at 32% compared to 31% at the same time last year. There are variances between Areas with outer London Areas consistently having higher rates than the London Areas. North Western Area has a particularly high rate compared to other Areas. It is proposed that a target is set next year to increase or maintain the end of year notifiable detection rate.

Overall notifiable offences - DETECTION RATE		2009-10	2010-11	2011-12	% +/- 2011-12 vs 2009-10	2011-12 (1 Apr - 29 Nov)	2012-13 (1 Apr - 29 Nov)	% +/- YTD

**DELIVERING VALUE FOR MONEY THROUGH CONTINUOUS IMPROVEMENT**

**4.5 Increase the percentage of budget spent on frontline resources**

This target is designed to complement the Chief Constable’s aim to ensure that as many of BTP’s resources as possible are dedicated to frontline policing. It is proposed that it is measured using the HMIC definition of frontline, which is ‘those who are in everyday contact with the public and directly intervene to keep people safe and enforce the law’. There is a measurement of this definition that includes:

- Officers and PCSOs in visible roles, for example, those responding to calls from the public and patrolling neighbourhoods.
- Officers and staff in specialist roles such as criminal investigation, forensics and surveillance.
- A proportion in middle office roles, including those managing or supporting police operations and processes such as working in custody suites and answering calls from the public.

It excludes:

- Some middle office roles such as processing intelligence and preparing files for court.
- Back office roles such as training, finance and HR.

Preliminary analysis using 2012-13 CIPFA Police Objective Analysis figures shows that BTP currently spends around 59% of its budget on those resources defined as frontline. SDD are currently working with Finance to confirm this amount. The most obvious way to increase this is to reduce the budget spent on back office and non-policing functions through process improvement, workforce modernisation and other organisational development activity.

NOT PROTECTIVELY MARKED

#### **4.6 Increase the availability of staff**

BTP's overall sickness rate has fallen by 40% since early 2007 and has seen incremental improvement for the last three years. Reducing sickness remains an organisation priority so it is recommended that this is a target for 2013-14. However, it is proposed that the target is enhanced to measure not just sickness but overall availability, for example, officers who are on temporary duty restrictions and who are not available for full deployment. This is complex task and is currently being worked on by Human Resources staff.

NOT PROTECTIVELY MARKED

**PROMOTING CONFIDENCE IN THE USE OF THE RAILWAY**

**4.7 Increase or maintain late night visibility from the 2012-13 figure**

Police visibility is a key driver of public confidence; rail staff and passengers feel that BTP’s presence on stations and trains is most important in the evening and into the early hours. In order to provide a visible presence when it is most needed, it is important that as many police officers, PCSOs and Special Constables as possible are deployed in roles that are visible to the public and at the times they are most needed. This year, the target measures the percentage of officers, PCSOs and Special Constables deployed as part of the 24-hour core and Neighbourhood Policing Teams between the hours of 8pm. and 1am. After discussion at SEB, a revised target has been proposed (and is currently undergoing consultation with Areas). This proposed target will measure the percentage of officers and PCSOs deployed between 8pm and 3am. In order for a more accurate picture of deployment to be recognised, the target will include:

- Late Turn officers who complete three or more hours after 8pm
- Night Duty officers who complete three or more hours before 3am
- All 6pm – 2am shift rostered officers who complete three or more hours between 8pm and 3am.

The figures below show performance over the last three years against the current target.

Increase the % of NPT and response units on duty between 8pm and 1am, as a proportion of total hours worked by all resources (excl. police staff).		2010-11	2011-12	2012-13 (1 Apr - 31 Oct 2012)
	London North	n/a	15%	15%
London South	n/a	15%	19%

**4.8 Increase the number of detections for public order offences for the 2012-13 figures**

Anti-social behaviour is widely recognised as a key determinant of confidence in both passengers and railway staff and his proposed target is focused on the sort of rowdy, loutish and unacceptable behaviour that is particularly impactful. Previous rail staff surveys shows that it affects rail staff more than any other crime and is consistently cited as a top priority for passengers through the National Passenger Survey. BTP has worked hard with railway operators to tackle anti-social behaviour and the detection rate in 2011-12 was 72%. The list of proposed offences within this target are listed overleaf together with the number of detections YTD. The following two tables show the last two years and current YTD situation in terms of detections and offences by Area:

Public Order offences – OFFENCES		2009-10	2010-11	2011-12	% +/- 2011-12 vs 2009-10
	London North	1,736	1,431	1,449	-17%
London South	2,068	2,222	1,889	-9%
