

Appendix B - BTP Stop and Search Data – August 2014

Guidance Notes

This analysis covers the period 1 April 2014 to 31 August 2014.

It is based on the latest stop and search figures compiled as of 15 September 2014. Numbers may change slightly as Divisions continue to enter details of encounters.

The data provided here is provisional and has not been audited. For this reason it may not be directly comparable with Home Office statistics. Calculations on very small sample sizes are unlikely to reflect the true nature of stop and search activity.

Glossary

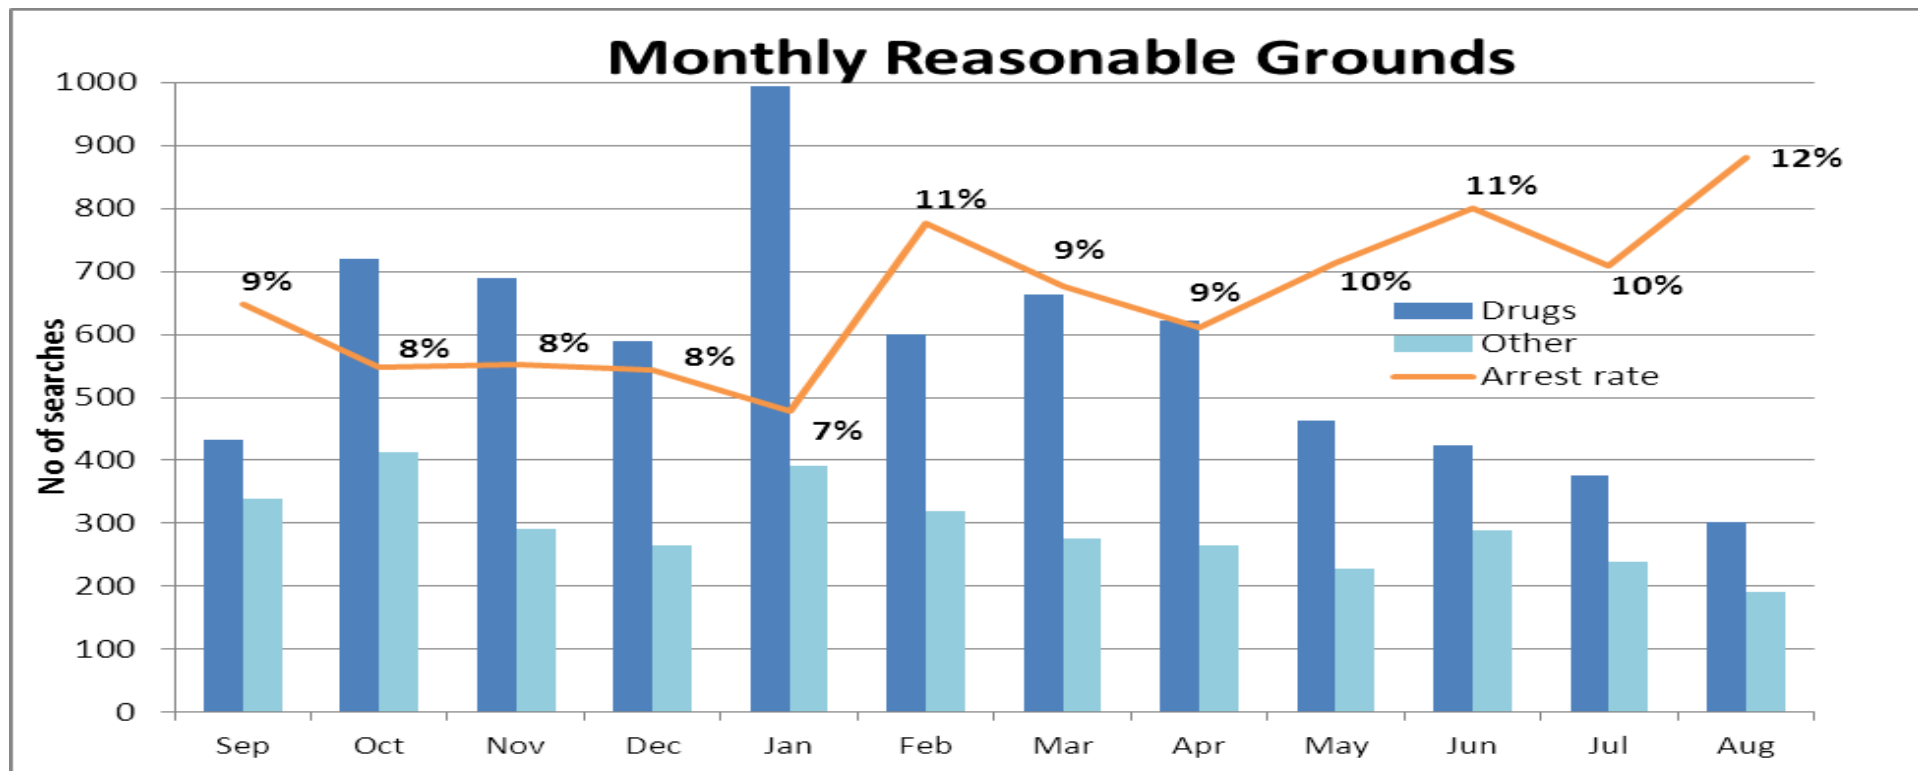

Self Defined Ethnicity (SDE) – the ethnic group as defined by the person stopped using national Census categories. Home Office forces are obliged by Section 95 of the Criminal Justice Act 1991 to report the ethnicity of those stopped and searched by their SDE.

Officer Recorded Ethnic Appearance (EA) – the ethnic group as perceived by the stopping officer according to Police National Computer (PNC) Ethnicity Codes. It is this data that is compared with population estimates from the 2011 Census (other than in Scotland and the age analysis which use 2001 Census data as the 2011 data is not yet available) to calculate the rate at which individuals from black, Asian and other minority ethnic backgrounds are stopped and searched. This figure is reported as the number of stops and searches per 1,000 head of population. Proportionality data is also presented; this should be treated with caution at Area level as they include varying mixtures of urban and rural communities, with different demographics. For the same reason, proportionality ratios are not published at Force level.

Population estimates – these are Census estimates of the total resident population within a given geographical area.
